

Linear input history: a token-by-token reading window

supporting clue
(linear position 0.28)

linearly out of reach inside the window

linear reading window
(recent context)

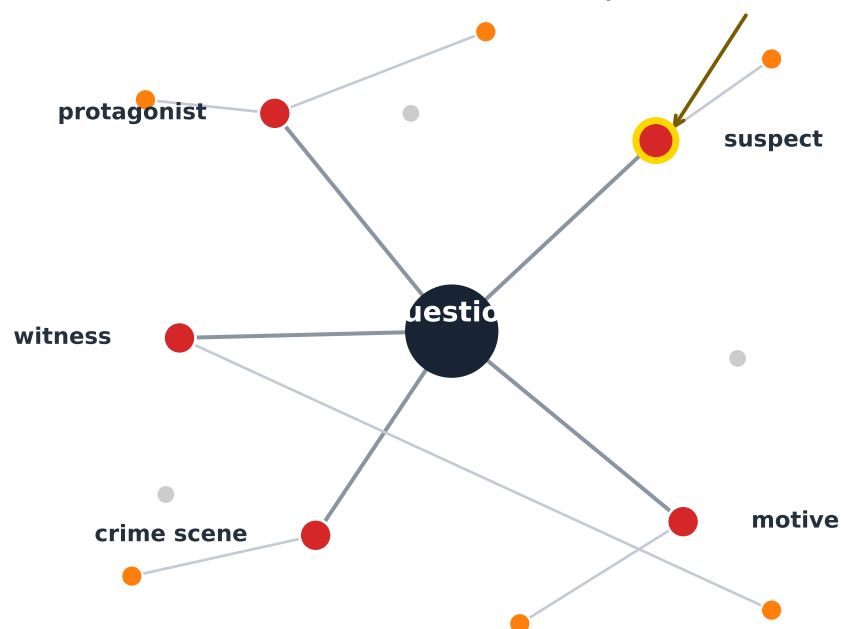

beginning

middle

end

Non-linear graph navigation: one hop from the question

the same supporting clue
(reachable in one hop)

hop depth: 1st hop (saturated) / 2nd hop (lighter) / unrelated (gray); the gold ring marks the evidence that linear history cannot reach
